On reaching a determination of the ecological water needs for each watershed or subwatershed, the Director is required to publish a preliminary report that includes specified information, post the report online, hold an open meeting and take public comment on the report, and submit the final report to the Governor and the Legislature. If the Director determines in any watershed or subwatershed that there is insufficient water to maintain, improve and restore ecological water, the Director is required to take all steps necessary to appropriate unappropriated water sufficient to maintain the ecological water requirements, and to purchase, lease or accept by gift or assignment existing water rights and transfer all acquired rights for beneficial use supporting ecological water. Program rules and permit requirements under the Program are subject to the same enforcement statutes as other water quality control programs and permits. During the process of establishing and assuming state jurisdiction over the Program DEQ is required to negotiate with the U.S. Army Corps of Engineers (USACE) to ensure that the USACE will continue to process as many pending applications for permits and requests for jurisdictional determinations as possible before the date on which this state officially assumes jurisdiction over the Program.
